

200 million kwh solar container solution

Overview

Each container is equipped with a photovoltaic array, a battery bank, and a generator — all custom-sized to meet the specific needs of the customer. With integrated remote monitoring and diagnostics, our containers offer maximum energy independence and operational reliability. Austrian startup Solar Container has introduced a groundbreaking solution to portable renewable energy with its innovative SolarCont system, housed in a standard-size container. This highly sophisticated system packs an impressive 240 solar panel modules, making it a game-changer for off-grid. Off-grid solar storage systems are leading this shift, delivering reliable and clean power to locations worldwide. The ZSC 100-400 can save up to 108 tons of CO2 annually as compared to similar range of diesel generators with virtually no fuel consumption.
