

Agricultural power grid solar container

Overview

A California almond farm uses solar shipping containers as backup power during outages while selling surplus energy daily. By organically combining photovoltaic power generation with agricultural cultivation, the agricultural industry can be driven toward. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Image: Paired Power California-based Paired Power, a manufacturer of integrated solar canopy and microgrid systems and. When the grid is hundreds of feet away (or non-existent), a self-contained power solution is ideal. Solar-driven agriculture merges solar energy production with farming on the same land.
