

# **America s new transportation solar container version**

## Overview

---

LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar arrays, reducing reliance on diesel fuel by 80% and are ideal for mining, factory production and. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. The solar installation now generates 50 percent of the terminal's annual energy needs, greatly reducing. The Port Newark Container Terminal in New Jersey is now one of the few shipping hubs in the world to use on-site solar power to cut its own emissions (cropped; courtesy of Standard Solar). RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. It provides clean, efficient power wherever you need it and can also generate profit. The container is equipped with foldable high-efficiency solar panels, holding 168-336 panels that deliver 50-168 kWp of power.
