

Be the first to lay out the solar container track

Overview

Learn how to set up a mobile solar container efficiently—from site selection and panel alignment to battery checks and EMS configuration. So, what do you do to make setup simple, especially in the field?

Dissect it with me. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. Whether you're managing a construction site, a mining operation, or an emergency. Ideal for locations lacking eco-friendly options, they're also eye-catching at events. The Port Newark Container Terminal in New Jersey is now one of the few shipping hubs in the world to use on-site solar power to cut its own emissions (cropped; courtesy of Standard Solar). However, in a recent industry & business talk, one comment stood out: “Customers aren’t asking where the container is.

Be the first to lay out the solar container track

Installing Solar Panels and Track To A 40' Off Grid Container Home

In this quick video Josh shows you how he installed 8 solar panels by himself! The panels are light weight and easy to move around. After he bolted the track
