

Bnp paribas solar container production

Overview

Conrad Energy activates its Larport solar farm, producing 40,000 MWh per year, to support BNP Paribas' net-zero operations in the UK. BNP Paribas is stepping up its support for the energy transition by massively redirecting its financing towards a low-carbon economy. With a final closing expected before the end of the year, the team will continue to ramp up its investment activity. The power sector has a direct impact (33% of greenhouse gas emissions), so decarbonising power generation is crucial to make electrification efficient, produce green hydrogen and low-carbon fuels, and to capture carbon. Dutch team expanded with financing specialists for innovative scale-ups EDF ENR, a leading company in solar energy production on buildings and canopy structures over parking lots, recently issued a tokenised bond through BNP Paribas to finance a solar energy project.
