Overview

These 20-40 ft containers—packed with solar panels and lithium batteries—generate 50-500 kWh daily. Did you know that Egypt’s annual solar irradiance exceeds 2,300 kWh/m²?

That’s 30% higher than Germany’s. To make green hydrogen a viable export commodity, Egypt must first stabilize its domestic energy supply and reduce its reliance on fossil fuels for electricity. Egypt is now one of the leading renewables companies in the region. The design is compact, allowing for easy transportation, easy installation and debugging, and low construction cost; The liquid cooling system ensures higher system efficiency and cell cycling up to 10,000 cycles. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide.
