

# Can the aerosol tank be dried

## Overview

---

Cool and dry: the aerosol tank should be stored in a cool and dry place, avoid direct sunlight and high temperature environment. High temperatures can lead to increased pressure inside the tank, increasing the risk of explosion. Your inquiry relates to the enforcement of OSHA's Process Safety Management (PSM) standard, 29 CFR 1910. Partially full containers that you know do not contain hazardous chemicals: To empty the can of its non-hazardous contents, discharge it.

## Can the aerosol tank be dried

---
