

# Change solar container plan

## Overview

---

The mission involved a multi-stage process including lunar orbit insertion, autonomous farside landing, sample collection by a lander and mini-rover (Jinchan), ascent, rendezvous and docking with an orbiter, and a skip reentry for sample return to Earth. Chang'e 6 (Chinese: 嫦娥六号; pinyin: Cháng'é liùhào) was the sixth robotic lunar exploration mission by the China National Space Administration (CNSA) and the second CNSA lunar sample-return mission. Like its predecessors in the Chinese Lunar Exploration Program, the spacecraft is named after the. The far-side is considerably older than the near-side : there might be lunar sample older than 4 billion years existed in the SPA basin.
