

China solar container technology new solar container

Overview

The container is equipped with foldable high-efficiency solar panels, holding 168–336 panels that deliver 50–168 kWp of power. It is the perfect alternative to unstable grid power and diesel generators, keeping operations running even in remote areas or where infrastructure is. As energy challenges grow, our solar container solution was created to meet the need. It provides clean, efficient power wherever you need it and can also generate profit. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. For procurement teams managing multiple project sites or supporting regions with difficult. Shanghai LZY Technologies displayed its innovative folding photovoltaic container at the China Import and Export Fair on April 15, 2025, and the booth welcomed a continuous flow of European, Southeast Asian, and Middle Eastern customers.
