

Chinese sofa that can store electricity

Overview

These hybrid pieces store solar or grid power using lithium-ion battery packs or supercapacitors hidden within their frames, providing 500W-2kW of backup power – enough to run lamps, laptops, and small appliances during outages [5]. Imagine plopping down on your sofa after a long day and hearing your phone chirp: "Battery fully charged!" No, you're not sitting on a lost power bank - you're experiencing the magic of an electricity-storing sofa, the latest crossover between furniture design and energy tech. Far Eastern Furnishings design, manufacture and retails solid wood furniture for over 60 years. Our experienced craftsmen leverage their skills passed down to them by generations of artisans to build some of the most exquisite furniture pieces in the world. Here at Tansu Asian Furniture Boutique, our style is simple and elegant, rustic and hand made, eclectic, yet classic. Classic Chinese furniture is typically made of a class of hardwoods, known collectively as "rosewood" (, literally "red wood").
