

# Current status of power storage fields

## Overview

---

Overall Q3 installations increased 31% year-over-year, though the market declined 6% compared to Q2 2025's record highs. 3 gigawatts (GW) installed nationwide, pushing 2025 year-to-date totals ahead of combined 2024's installations according to the latest U. Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. The US energy storage market just posted its strongest Q1 ever, adding more than 2 gigawatts (GW) of capacity across all segments, according to the latest US Energy Storage Monitor from Wood Mackenzie and the American Clean Power Association (ACP). Government nor any agency thereof, nor any of their employees, makes any warranty, expressed or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness, of any information, apparatus, product, or. This report explores how economic forces, public policy, and market design have shaped the development of stand-alone grid-scale storage in the United States.
