

# Electric car home photovoltaic solar container

## Overview

---

A solar carport is an open-sided structure that shelters cars from the elements, with a roof made of solar panels that captures photon energy. Solar carports can be used to charge electric vehicles and provide energy to nearby businesses, homes, or the local utility grid. It has a photovoltaic installation containing solar modules and integrated batteries. Elevate the value of your space, offering shade and protection for your vehicle, all.
