

Electric car solar container clean into home solar container

Overview

Lou goes through exactly how he built our off grid DIY power station to run everything we need in the shipping containers. This shipping container build has been a pretty epic adventure, can't wait to see where things progress as winter sets in!. It's more expensive since you're paying for a pre-designed and engineered solution, but damn if it doesn't make it easy! To save a bit of money instead, you can source your own solar panels, solar charge converter, batteries, inverter, and wiring, then make it all play together. If you've ever dreamed of building a completely off-the-grid small house with a large enough solar system to even charge an electric car, then this is the home for you! Constructed in Northland, New Zealand, this amazing 40ft shipping container home has it all, including an amazing solar array. Imagine a world where your house produces its own electricity and your vehicle is powered by energy that you have produced.

Electric car solar container clean into home solar container
