Clean Energy Associates (CEA) says it has identified a major gap in ESG (Environmental, Social, and Governance) risk identification and management. According to CEA: Most global solar and energy storage developers neither understand nor fully mitigate the ESG risks in their. This report reviews key quality infrastructure and ESG standards for solar PV supply, and represents IRENA's contribution to the Transforming Solar Supply Chain initiative of the Clean Energy Ministerial (CEM). Supply chain development is crucial for solar photovoltaic (PV) capacity growth;. From compliance with customs rules on solar imports to avoiding future reputational damage, there are many reasons why it pays to stay on top of solar and energy storage supply chains. The Solar Stewardship Initiative (SSI) is a solar-specific supply chain assurance scheme, working to further develop confidence in how, where, and by whom, solar products are manufactured. Following the successful conclusion of the SSI pilot and public multi-stakeholder consultation, the new SSI. ESG | ESG is now at the centre of many investor requirements when it comes to finalising deals, and while solar is obviously a destination of choice from an environmental perspective, that is only part of the puzzle.
