Overview

To address the low efficiency and flammability of wood-based phase change materials (WPCMs) in solar energy storage, this study developed a series of WPCMs (PEG/TPP/DW-P) with both flame retardancy and solar-thermal energy storage properties by. Photothermal conversion technology based on organic phase change materials (PCMs) has been widely applied. However, challenges such as flammability, leakage, and low thermal conductivity of organic PCMs have hindered their large-scale deployments in photothermal applications.

Flame-retardant wood-based composite phase change materials

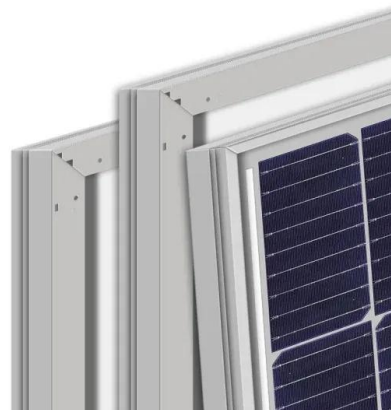

...

The current research has very broad application potential in the practical application of WPCMs as buildings. Graphical Abstract Wood-based composite phase change materials based on ...

Aerogel-Based Phase Change Materials Meet Flame Retardancy:

...

This review systematically summarizes current flame-retardant approaches for aerogel-based PCMs, highlights recent advances in aerogel-supported systems, and outlines the key ...

Flame-retardant shape-stabilized phase change composites with ...

Building thermal management is responsible for over 40 % of total energy use, of which about 20 % is directly related to the operation of heating. Materials saving energy to heat buildings ...

Flame-retardant wood-based composite phase change materials

...

Semantic Scholar extracted view of "Flame-retardant wood-based composite phase change materials based on PDMS/expanded graphite

coating for efficient solar-to-thermal energy ...

Research on flame-retardant phase change materials in thermal

o Development of flame-retardant phase change materials can effectively delay battery thermal runaway and reduce heat transfer. o 10 mm flame-retardant phase change layer cuts peak ...

Flame-retardant and leakage-proof phase change composites based ...

To address the problems of easy leakage and high flammability of phase change materials, a series of innovative leakage-proof phase change composites (PCCs) with excellent solar ...

Flame-retardant shape-stabilized phase change ...

In this study, we have developed a series of flame-retardant and shape-stabilized PCCs by incorporating MXene@PTA and flame-retardant PD into a waterborne polyurethane framework ...

Flame-retardant wood-based composite phase change materials

...

To address the low efficiency and flammability of wood-based phase change materials (WPCMs) in solar energy storage, this study developed a series of WPCMs (PEG/TPP/DW-P) with ...

Flame-retardant shape-stabilized phase change composites with ...

Phase change materials (PCMs) offer a promising solution to address the challenges posed by intermittency and fluctuations in solar thermal utilization.

Graphene aerogel stabilized phase change material for thermal ...

Mentioning: 8 - Graphene aerogel stabilized phase change material for thermal energy storage - Zhao, Yajing, Zhang, Kai, Min, Xin, Xiao, Jun, Xu, Ziling, Huang

Exploring flame-retardant, shape-stabilized multi-functional composite

The flame-retardant mechanisms are elaborated, and the relationship between structure and performance is emphasized. Advanced applications of these CPCMs, including battery thermal ...

Flame-retardant wood-based composite phase change materials

...

Wood-based composite phase change materials based on polydopamine functionalized carbon dots for efficient solar-to-thermal energy storage and flame-retardant applications. Discover ...
