## Overview

---

1 GWh, representing a year-on-year increase of 26%, after deployments in 2020 surpassed 1 GW for the first time (1. Extreme weather events like **\*\*Texas' 2021 winter grid collapse\*\*** further push utilities to deploy BESS for backup power. Growth is driven by the rising adoption of off-grid and hybrid power solutions, especially in remote, disaster-prone, and developing. Annual battery storage installations will exceed 10 GW/28 GWh in 2021, following a particularly strong year in 2020, despite the challenges created by the global pandemic, writes IHS Markit analyst Mike Longson. As gas generation declines and renewable energy rises, large-scale batteries have become not just a backstop but the foundation of grid reliability - the connective technology enabling the world's shift toward stable, low-carbon power. The market's expansion is fueled by several key factors: the rising adoption of renewable energy sources to combat climate change and.
