

High aspect ratio solar container characteristics

Overview

Key design characteristics including launch mass and volume as well as deployed structural properties (strength, stiffness, etc. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. LZY offers large, compact, transportable, and rapidly deployable solar storage containers for reliable energy anywhere. Structural performance metrics for state-of-the-art 30-50 kW flexible blanket arrays recently demonstrated in ground tests are approximately 40 kW/m³ packaging.
