

Home solar container packaging

Overview

A typical solar panel packaging consists of a cardboard box with the footprint of a pallet and houses between 26 to 36 panels in the box. Therefore it is important to create a reliable solar packaging solution that can withstand the stresses of transport and ensure the solar panels arrive at their destination safely, without a scratch. Applying that knowledge and expertise, we will partner with you to understand your company's unique packaging needs and develop custom solutions. To Master the Vertical Packing Technique of Photovoltaic Panels, learn first why it's been such a buzz for mobile deployment, what techniques make it valuable, and how to perform it safely and effectively. Vertically stacked panels significantly increase shipping density, reduce handling damage.

Home solar container packaging

Buy solar module packaging , PV packaging wholesale
