

How long does it take to approve the construction of an solar container station

Overview

According to the World Energy Investment 2023 report, the average permitting time for renewable projects in the United States is approximately two years. Distributed solar photovoltaic prices have plummeted over the past decade, but nonequipment “soft costs” such as permitting, inspection, and interconnection remain stubbornly high. Review and approval processes associated with the 20,000 distinct jurisdictions and 3,000 utilities can sometimes add. The fastest five states are New York (25 days), Nevada (27 days), Texas (28 days), California (29 days), and Illinois (30).
