

# **How to classify independent solar container in source test network**

## Overview

---

This guide provides a clear overview of utility witness tests, from preparation to the post-test steps, helping you navigate this essential phase with confidence. We certify products that meet international standards through independent evaluation. In the standard, the test is classified into categories 1 and 2 according to the size of the PV system. When you're about to roll out containerized solar systems--for a Haitian humanitarian mission or a telecom project in Namibia--you'll soon have to answer a crucial question: what certifications should solar containers have to ensure safety, performance, and compliance with regulations?

Solar. Assisting local governments across New York State in navigating and managing solar energy development in their communities. There are two tables in this database: Stationary Energy Storage Failure Incidents - this table tracks utility-scale and commercial and industrial (C&I) failures.
