

Hydropower solar container business park

Overview

5 million sqm distribution centre in Ham, Belgium that is powered entirely by wind, solar, geothermal, hydroelectric and biomass power, and which recycles 95 per cent of its onsite generated waste. The project supports PNCT's mission toward a net-zero energy microgrid and PANYNJ's commitment to reaching net-zero carbon emissions by 2050. Baraka joined the Port Authority of New York and New Jersey and Port Newark Container Terminal (PNCT) today to announce the completion of one of the largest solar power installations at any container terminal in the world. The solar installation now generates 50 percent of the terminal's annual energy needs, greatly reducing.
