Overview

With that in mind, here's a look at seven top water stocks and exchange-traded funds, or ETFs, that include utilities as well as other types of companies: *30-day SEC yield as of Dec. Investing in water through ETFs provides geographical and sectoral diversification. Will this make the world's first trillionaire?

Are they right for you?

Water is the most important commodity that we largely take for granted. Water contributes significantly to industries such as agriculture, food production, and even semiconductor manufacturing. As the importance of water sustainability becomes ever more apparent, so too do the potential rewards of investing in water. Freshwater is our planet's most precious resource, yet innovations to solve the world's greatest water challenges often receive insufficient attention and funding.
