Jakarta liquid flow solar container project bidding information

Overview

Jakarta's recent tender for energy storage solutions highlights Indonesia's push toward renewable energy adoption. With a growing demand for stable power grids and sustainable infrastructure, this project aims to address the challenges of solar and wind energy. Minimal term of payment is 30 days upon submitting the invoice to accounting department. Suppliers who are willing to quote to input their offer through ebidding JICT only. This 20ft collapsible container solution features 60kW solar capacity and 215kWh battery storage. Built with robust 480W modules, it powers extended off-grid missions, from microgrids to rural factories, ensuring continuous operation even under adverse conditions.
