

Luxembourg city outdoor solar container system composition

Overview

Project features 5 units of HyperStrong's liquid-cooling outdoor cabinets in a 500kW/1164. The "all-in-one" design integrates batteries, BMS, liquid cooling. Solar panels spanning 4,500 m² have been installed on the roof of the company's tram servicing facilities. The installation, a partnership between Luxtram, Enovos and Voltranovos, is producing energy at a rate of 481,770 kWh per year - enough to supply an estimated 122 households. The 500kW solar panel plant consists of 840 x 600w solar panels, 15 x PV combiner boxes, 15 x MPPT solar controllers, 2 x 250kW IGBT three-phase hybrid solar inverters (total 500kW hybrid solar inverter), 180 x 2v2000ah gel batteries, Special battery. The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. The storage system smooths out these fluctuations like a shock absorber for the power grid. With 47% of its electricity already from renewables, the city now eyes solar storage as the missing puzzle piece for a 24/7 clean energy supply. Who's Reading This?
