

Marshall islands mobile solar container power plant operation

Overview

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. The project, implemented by MEC, has a budget of \$34 million and a lifespan from 2017 to 2022, with an extension until October 2024. Three technicians from the China-based corporation SinoSolar arrived in Majuro last month after four weeks of quarantine to begin working with MEC on next steps of the program that will see at least two new generators installed at the MEC power plant and installation of solar equipment to provide as. Energy storage systems (ESS) paired with solar/wind offer a lifeline - reducing fuel dependence by up to 70% while stabilizing grids in this vulnerable archipelago. Marshall Islands power station portable solar renewable energy for the Marshall Islands. The company is thereby enabled to enter into direct Power Purchase Agreement (PPA) negotiations with the Virgin Islands Water and Power Authority to build an OTEC plant on the island of Saint Croix.
