

# **Marshall islands new solar container equipment enterprise**

## Overview

---

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. The World Bank will pump \$60 million into the Marshalls Energy Company for a mix of alternative energy systems for Majuro, Ebeye and six outer islands where MEC supports power operations. These innovations have improved ROI significantly, with commercial projects typically achieving payback in 4-7 years depending on local electricity rates and incentive. MEC is responsible for on-grid and off-grid electricity generation, transmission, and distribution throughout the Marshall Islands except for many atolls are there in the Marshall Islands?
