## Overview

Autonomy: Solar containers provide a stable energy supply, no grid necessary. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. But here's the kicker—air-cooled systems are like the unsung heroes quietly powering warehouses, factories, and mid-sized solar farms. The Nassau project combines three SEO goldmines: The "Aha!" Moment in Thermal Dynamics Traditional battery farms in the Bahamas faced a ridiculous problem - they needed more AC to cool the batteries than the batteries could store. These self-contained units come with solar panels, batteries, inverters, and control systems pre-installed.
