

# National development solar container profitability

## Overview

---

Overall, we expect the national community solar market to grow by 7% annually on average through 2028. Large development pipelines in both new and mature state markets bolster near-term growth. Longer-term, Solar for All funding and the availability of the ITC adders will support. As the photovoltaic (PV) industry continues to evolve, advancements in National development solar container profit rate have become critical to optimizing the utilization of renewable energy sources. From innovative battery technologies to intelligent energy management systems, these solutions are. Growth is driven by the rising adoption of off-grid and hybrid power solutions, especially in remote, disaster-prone, and developing. The market, estimated at \$2 billion in 2025, is projected to expand at a Compound Annual Growth Rate (CAGR) of 15% from 2025 to.
