

Ouagadougou has included solar container power station

Overview

Since 2022, Bairen Energy Storage has deployed 47 battery energy storage systems (BESS) across West Africa. Their Ouagadougou flagship project—a 20MW/80MWh lithium-ion facility—powers 15,000 homes after dark using solar energy captured during daylight. With ECOWAS countries pledging 35% renewable integration by 2025, Ouagadougou's success is already influencing neighboring nations. The power station was developed by a consortium led by GreenYellow, a French IPP and subsidiary of the Casino Group, in partnership with a group of financiers and donors referred to as the Africa Energy Coopération (AEC). Construction of the Ouagadougou-Donsin international airport terminal at the airport site located approximately 35 km northeast of Ouagadougou, the capital of Burkina Faso, is set to start in March. This article explores its technical blueprint, regional impacts, and why it matters for renewable energy.
