## Overview

---

These portable solar systems are transforming power access in disaster relief zones, rural communities, and temporary industrial sites. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Solar power containers combine solar photovoltaic (PV) systems, battery storage, inverters, and auxiliary components into a self-contained shipping container. By integrating all necessary equipment within a transportable structure, these units provide modular, plug-and-play renewable energy systems. In recent years, mobile battery containers have emerged as a game-changing innovation in the realm of off-grid power solutions.
