## Overview

---

This paper analyzes the concept of a decentralized power system based on wind energy and a pumped hydro storage system in a tall building. These shipping-container-turned-power-banks now serve diverse audiences: But when Botswana's solar farms. Energy storage systems can increase peak power supply, reduce standby capacity, and have other multiple benefits along with the function of peak shaving and valley filling. The Botswana Tram Energy Storage Power Station, commissioned last month, tackles this paradox through its 300MWh battery-solar hybrid design.
