

Shangneng electric solar container return

Overview

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. "When the grid needs it, you release that air into an air turbine and it generates electricity again," explains Jon Norman, president of the Canada-based company Hydrostor, which specializes in energy storage. This home is 1,200 square feet and has a 250kW string inverter. On November 4, 2020, Shangneng Electric's 250kW string inverter was launched globally, with a maximum efficiency of 99%. Despite the second echelon, the energy storage market is large enough and the prospects are good enough.
