Ameren, which generates and distributes electricity, has been steadily investing in offering electricity through cleaner sources of energy generation, such as solar, wind, natural gas. One of the largest lithium battery producers on the planet, Panasonic is the go-to company for firms that need energy storage products for EVs, grid-scale storage and other next-gen battery applications. Panasonic trades "over the counter" and not on a major exchange, however, so investors should. These innovative batteries offer a critical advantage, primarily via their vastly reduced charging times for EVs. According to the International Energy Agency's ("IEA") Global Energy Review report, published in March 2025, global electricity generation grew over 1,200 terawatt-hours (TWh) in 2024, with clean energy accounting for 80% of this growth.
