

Sodium ion solar container sector

Overview

According to our latest research, the global sodium-ion grid battery container market size reached USD 1.12 billion in 2024, demonstrating a robust upward trend driven by increasing demand for sustainable and cost-effective energy storage solutions. But unlike lithium, a somewhat rare element that is currently mined in only a handful of countries, sodium is cheap and found everywhere. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide.
