Stack installation display

Cabinet and rack installation display

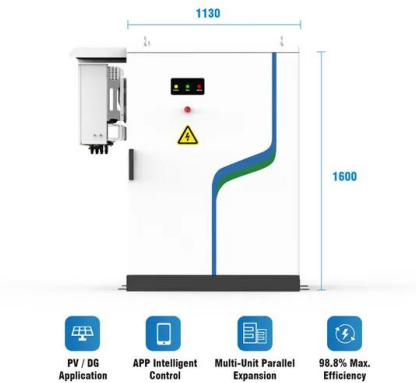

Overview

Laying solar panels on the roof of a container not only gives it new functions, but also transforms it into a small independent power generation unit. Are you considering mounting solar panels on a shipping container and wondering what to keep in mind?

This article offers a concise overview to help you understand the key considerations and shows you some real-world examples. Stealth Power provides fleet electrification and off grid solar solutions for customers of all kinds. The container itself was received from the client — we had to supply the mounting. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.
