

Solar container fluid equipment

Overview

From portable units to large-scale structures, these self-contained systems offer customizable solutions for generating and storing solar power. The container is equipped with foldable high-efficiency solar panels, holding 168-336 panels that deliver 50-168 kWp of power. It is the perfect alternative to unstable grid power and diesel generators, keeping operations running even in remote areas or where infrastructure is weak. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.
