## Overview

---

Solarliquid® L ensures corrosion protection, thermal stability, and high efficiency. LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar. Governments, humanitarian organizations, and private enterprises are focusing on solar containers to deliver sustainable, emission-free power for disaster relief, military operations, rural electrification, and construction projects. Efficient thermal energy transfer, long-term system protection (including flat plate and vacuum tube collectors), frost protection (circuit) and minimal environmental impact, all need to be taken into account when selecting the correct fluid for your solar thermal system. The Radco XCEL THERM® line of solar heat transfer fluids is ready today for a greener tomorrow.
