

# Solar container signal is weak

## Overview

---

Many modern solar monitoring systems will send alerts if they detect weak or lost Wi-Fi signals, failed login attempts, or inability to reach the monitoring server. These connectivity warnings are critical early signs that a solar system communication issue needs to be. These systems act as the digital heartbeat of your solar installation, constantly transmitting vital data about your energy production, consumption, and system health. When communication issues occur, you lose visibility into how well your system is performing. Hello everyone , I have just recently brought a container house and as expected I have very little to no signal inside the house. is anyone else experiencing a loss of connection from their Sungrow inverter to the web app and phone app?

From mid afternoon Sunday 18th Dec the phone app was showing my device offline but a visual check of the unit showed it was running and the WiFi dongle showing connected ( green COM led and.
