

Solar container technology master code

Overview

From portable units to large-scale structures, these self-contained systems offer customizable solutions for generating and storing solar power. About this chapter: The source code for section numbers in parenthesis is the 2018 International Building Code®, except where the International Fire Code® has been denoted. SEIA monitors and participates in the development of product standards and building codes on behalf of the solar industry. California's 2025 Energy Code (Title 24) brings significant changes, mandating solar and energy storage for new construction, including single-family homes, multifamily units, and specific non-residential properties. The provisions are intended to protect property and life from the hazards associated with high-temperature liquids, pressurized systems and toxic fluids.
