

Strong power storage

Overview

Energy storage systems with strong power capabilities are transforming how industries manage energy. The smart photovoltaic energy storage all-in-one is an integrated solution that integrates photovoltaics, energy storage, and inverters to realize “photovoltaic + energy storage”. Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in New York City in service just in time to help meet summer electricity demand peaks. The New York Power Authority (NYPA) is collaborating with Cornell University and the Electric Power Research Institute to demonstrate use of a quieter and no-emission mobile battery to power campus events. Our ESS products feature superior safety, smart and efficient technologies, long life cycles and wide applications.
