

# Super large lithium battery solar container plant

## Overview

---

The Phase III project is made up of 122 individual containers that, together, house more than 110,000 battery modules. It came online on June 2 and is now storing power and releasing it to California's grid. Lithium batteries are CATL brand, whose LFP chemistry packs 1 MWh of energy into a battery volume of 2. The Moss Landing Energy Storage Facility, the world's largest lithium-ion battery energy storage system, has been expanded to 750 MW/3,000 MWh. Megapack is a powerful, integrated battery system that provides clean, reliable, cost-effective energy storage to help stabilize the grid and prevent outages. Reducing our reliance on fossil fuels and strengthening our grid infrastructure will make sustainable energy more accessible and affordable. (Reuters) - A major battery plant near Los Angeles will be among the largest in the world when it comes online later this year, promising to shore up California's power grid during the peak summer season and help the state meet ambitious climate goals.
