

# Swedish thermal power storage power station

## Overview

---

Well, Sweden just clinched a landmark bid for thermal power storage —a move that's sparking chatter from Stockholm to Silicon Valley. 5% of total power plant installations globally in 2023, according to GlobalData, with total recorded thermal capacity of 4,608GW. As thermal energy accounts for more than half of the global final energy demands, thermal energy storage (TES) is unequivocally a key element in today's energy systems to fulfill climate targets. Starting from the age-old TES practices in water and ice, TES has progressed today into many energy. at is the largest battery energy storage system in Sweden?

Named Isbillen Power Reserve, the 1-hour duration Battery Energy Storage System project will be the largest in Sweden and the largest in the Nordics by megawatt (MW) power.
