

# The latest planning scheme for solar container power stations in the west

## Overview

---

The proposed updated Western Solar Plan identifies areas for potential solar development on BLM-managed public lands across the West. It expands the planning area from the original six states (AZ, CA, CO, NV, NM, UT) to include five additional states (ID, MT, OR, WA, and WY). The Government propose changes to the Nationally Significant Infrastructure Project (NSIP) regime to increase the threshold at which solar projects are determined as an NSIP and to re-introduce onshore wind into the NSIP regime and set the threshold to 100MW. The LunaVault paves the way for a sustainable and independent energy future, demonstrating the limitless potential of renewable power systems.
