

Washington solar container power station explodes

Washington solar container power station explodes

As NW faces rolling blackouts, study says renewable energy may not ...

The greater Northwest region could experience a 9-gigawatt energy gap by 2030, or about the same amount of power consumed by Oregon. That could lead to rolling blackouts during ...

FBI looking into Tesla Supercharger damage incident, latest in series

(Reuters) -The Federal Bureau of Investigation said it was looking into an incident that left a Tesla Supercharger station damaged in a city in Washington in the wee hours of Tuesday. Electrek

BESS Incidents

To keep the temperature down, an automatic sprinkler system was left running the entire time. A robot was eventually used to open the doors of the container, which kept the responders at a safe distance ...

What a major battery fire means for the future of energy storage

In the wake of high-profile fires like Moss Landing, there are very understandable concerns about battery safety. At the same time, as more wind, solar power, and other variable ...

Fire at world's largest battery facility is a clean energy setback

A fire at the world's largest battery storage plant in California destroyed 300 megawatts of energy storage, forced 1200 area residents to evacuate and released smoke plumes that could pose ...
