

What are the national standards for solar container equipment

Overview

SEIA standards apply to solar and energy storage sourcing, manufacturing, transportation, design, installations, operations, and recycling. The Energy Commission's Solar Equipment Lists include equipment that meets established national safety and performance standards. These international standards ensure your solar panels are safe (61730) and operate as in real life (61215). UL 1741 or IEC 62109 (Inverters & Hybrid Systems) UL 1741 is a key North American specification for grid-interconnected. NFPA is keeping pace with the surge in energy storage and solar technology by undertaking initiatives including training, standards development, and research so that various stakeholders can safely embrace renewable energy sources and respond if potential new hazards arise.
