

What are the solar containers in georgia

Overview

Hover over a solar project to view information on each project like their name, capacity and construction date. Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort. The International Renewable Energy Agency (IRENA) says Georgia holds vast potential for solar, with most prime sites for deployment concentrated in the country's east, based on a recent zoning assessment. Land availability - utility scale solar requires significant land area - a 500MW solar array requires 2,500 acres of land. Follow the money - like all development, tax incentives often drive the location of these projects.
