

# Which department is responsible for solar container

## Overview

---

The Department of Energy serves as the principal entity responsible for the oversight and promotion of solar energy across the United States. Universal waste handlers that accept more than 100 kilograms (or 200 pounds) of PV modules from any offsite source or that generate 5,000 kilograms (or 10,000 pounds) or more of PV modules in the calendar year 2024 shall submit a completed written annual report by February 1 of 2025. The Self-Generation Incentive Program (SGIP) is a State of California initiative that provides funding for income qualified residential customers to install solar and battery storage systems on residential property. On this page: Are Solar Panels Hazardous Waste?

Solar panels provide clean, renewable. PV modules include integrated components that cannot be separated without breaking the PV module glass. While they do not provide return on investment calculations, our team can still help you understand key steps in the interconnection process.
