

# **Why is there overcapacity in the solar container industry**

## Overview

---

According to Braemar's latest Quarterly Container Fleet Statistics, a surge in new vessel orders and a sharp drop in scrapping activity are widening the supply-demand gap. Global container capacity is set to expand by 10% this year over 2023 despite expectations that vessel recycling will hit records levels. Meanwhile, container volume growth will be just 3% to 4%, according to shipowner association BIMCO. 3m teu was ordered during the first half of the year, with carrier appetite for tonnage "only marginally slowed" from the vast 3.

## Why is there overcapacity in the solar container industry

---

### Container shipping still has an overcapacity problem, but ...

To mitigate overcapacity, carriers can fall back on idling ships. Although not without additional maintenance and storage costs, there's plenty of potential to idle more of the fleet. Just 0.8% of the ...

### How carriers are changing tactics across global trades to tackle

With a forecast for container demand growth of 3% against fleet growth of 3.6%, the overcapacity headache will get worse for carriers in 2026. Carriers have demonstrated their ability to ...

### Container Shipping Faces Prolonged Overcapacity Through 2028, ...

Due to the lag between order and delivery, there is 3.3 million teu scheduled to be delivered in 2028, while the average net fleet growth is expected to reach 7.3%.

### Container shipping: sailing through uncertainty and looming overcapacity

Container lines still sit on a pile of cash after windfall industry profits of around \$300bn in 2021 and 2022, as well as the third most

profitable year on record in 2024.

### Shipping Container Utilisation: The challenge and Why it Matters

If your company struggles with wasted space in shipping containers, these tips might help you discover ways to improve utilisation and save freight costs.

### The opportunity in China's solar 'overcapacity'

But the world's solar factories -- overwhelmingly in China -- now have enough capacity to produce 1,200 gigawatts' worth, most of which is sitting unused, according to BloombergNEF ...

### ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

### DETAILS AND PACKAGING

- 1 USER MANUAL PDF
- 2 RJ45 Cable For RS485/CAN
- 3 Battery in Parallel Cables
- 4 RJ45 TO USB Monitor Cable
- 5 M8 Terminal\*4

### Two tier container market from overcapacity paradox

Global trade has expanded faster than was anticipated two years ago according to some observers leading to an easing of the imbalance between supply and demand in the container industry.

### Global renewable capacity is set to grow strongly, driven by solar PV

Solar PV will account for around 80% of the global increase in renewable power capacity over the next five years - driven by low costs and faster permitting timeframes - followed by wind, ...

### Container Shipping Overcapacity: Analysts Warn of Challenges Until ...

Discover why analysts forecast ongoing overcapacity challenges in the container shipping industry until 2028. Explore key insights, market trends, and expert predictions that shape the future ...

### Why is there overcapacity in China's PV industry in its early growth

Overcapacity in China's photovoltaic industry refers to overcapacity of photovoltaic products such as silicon, polysilicon, solar cells, and photovoltaic modules (Wang et al., 2014).

### Overcapacity, larger ships mean challenges for carriers, pain for

It is an irony of container shipping, well established over the course of decades, that actions available to carriers to protect their profitability almost always accrue to the disadvantage of their customers. And ...

### Overcapacity paradox leading to two tier container market

Overcapacity paradox leading to two tier container market Container shipping faces a chronic oversupply of megaships and deepening shortage of smaller-to-mid-sized vessels.

### Why building in overcapacity at solar power plants makes so much ...

Newer solar installations already have significant overcapacity, to the extent that the inverters they feed usually have considerably less capacity than the total generation volume, until ...

### Why is energy overcapacity a problem?

The in-depth analysis of the overcapacity in Europe and its causes presented in this section; in particular, we identify the errors in forecasts of fuel prices as a cause of overcapacity. Causes of and ...

### Determinants of overcapacity in China's renewable energy industry

The results show that overcapacity differs among China's non-hydropower renewable energy industries--it is the most serious in the PV industry, followed by the wind and biomass ...

## Container Shipping Faces Prolonged Excess Capacity

Industry projections suggest average overcapacity of around 27% through 2028. While unforeseen shocks may disrupt the outlook, the medium-term picture points firmly to a prolonged ...

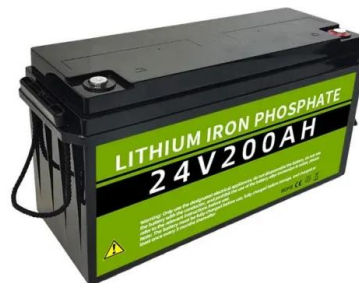

## Is the container shipping system running out of capacity?

The longer sailing times absorbed container equipment as well, an issue that strikes at the heart of the system because without containers, cargo can't move. Sharply higher new and used container prices ...

## What are the effects of solar panel overcapacity? , NenPower

Solar panel overcapacity occurs when the supply of solar energy systems exceeds the existing demand for electricity generated through solar power. This situation often results from rapid ...

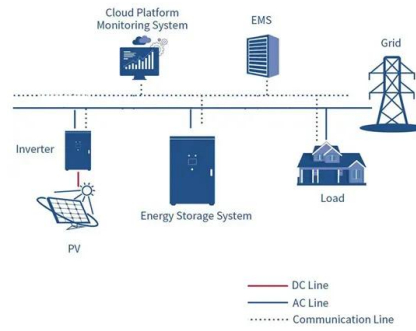

## China's Solar Overcapacity Sparks International Concerns

China's significant production of solar panels has led to a dramatic decrease in prices, facilitating the country's clean-energy transition. However, Chinese manufacturers now face ...

## Container Shipping Faces Overcapacity Crunch Until 2028

The container shipping industry is heading into a prolonged period of overcapacity, with analysts warning that supply will continue to outpace demand until at least 2028.

## Can the cancellation of government subsidies alleviate the ...

After the cancellation of government subsidies, how the phenomenon of overcapacity that has always existed in the module manufacturing industry will develop is one of the essential issues that we need ...

## China's Solar Chain: Why Overcapacity Still Threatens Profitability in ...

China's solar industry faces one of its toughest battles yet--managing chronic overcapacity. Despite Beijing's renewed push to curb "revolutionary" competition and coordinated supply reductions by ...

## Literature Review on Overcapacity of Photovoltaic Industry from ...

The existing research literature on the overcapacity of photovoltaic industry in China has made a more perfect discussion and analysis on the concept, formation mechanism, resolution strategy and ...

## How carriers are changing tactics across global trades to tackle

The Xeneta Ocean Outlook 2026 - published in October - highlighted overcapacity in container shipping as a key theme for the year ahead - and we are now seeing the different ways ...

## Why is there overcapacity in China's PV industry in its early growth

The overcapacity in China's PV industry here refers to overcapacity of PV products such as silicon, polycrystalline silicon, solar cells and PV modules. Impacted by the US Financial Crisis ...

## Squeezed Seas: Container Market Faces Overcapacity as New Ships ...

The container shipping industry is bracing for a challenging year, with an influx of new ship deliveries set to create significant overcapacity. As these new vessels join global fleets, analysts ...

## Global clean tech at a crossroads: China's overcapacity challenges

With China's annual manufacturing capacity for solar modules and battery cells poised to far exceed global demands, we stand before an edifice of overcapacity.
