

Xiao han talks about solar container

Overview

The penultimate solar term is Xiao Han, meaning “Lesser Cold”, a time where, in many parts of China, people stay indoors out of the cold, preparing paper decorations ahead of the upcoming spring festival. As the photovoltaic (PV) industry continues to evolve, advancements in solar container have become critical to optimizing the utilization of renewable energy sources. From innovative battery technologies to intelligent energy management systems, these solutions are transforming. Traditionally, the temperature is the lowest during the Xiao Han solar term (even lower than the next solar term, Da Han ()) most of the time.
